We've got you under our wing.®

Aflac can help ease the financial stress of surviving a critical illness.

Chances are you may know someone who's been diagnosed with a critical illness. You can't help notice the difference in the person's life—both physically and emotionally. What's not so obvious is the impact a critical illness may have on someone's personal finances.

That's because while a major medical plan may pay for a good portion of the costs associated with a critical illness, there are a lot of expenses that may not be covered. And, during recovery, having to worry about out-of-pocket expenses is the last thing anyone needs.

That's the benefit of an Aflac Group Critical Illness plan.

It can help with the treatment costs of covered critical illnesses, such as a heart attack or stroke.

More importantly, the plan helps you focus on recuperation instead of the distraction of out-of-pocket costs. With the Critical Illness plan, you receive cash benefits directly (unless otherwise assigned)—giving you the flexibility to help pay bills related to treatment or to help with everyday living expenses.

Understanding the facts can help you decide if the Aflac Group Critical Illness plan makes sense for you.

- Aplastic anemia
- Congenital neutropenia
- Severe immunodeficiency syndromes
- Sickle cell anemia
- Thalassemia

Cancer (internal or invasive) is a disease that meets either of the following definitions:

A malignant tumor characterized by:

- The uncontrolled growth and spread of malignant cells, and
- The invasion of distant tissue.

A disease meeting the diagnostic criteria of malignancy, as established by the American Board of Pathology. A pathologist must have examined and provided a report on the histocytologic architecture or pattern of the tumor, tissue, or specimen.

Cancer (internal or invasive) also includes:

- Melanoma that is Clark's Level III or higher or Breslow depth equal to or greater than 0.77mm,
- Myelodysplastic syndrome – RAEB (refractory anemia with excess blasts),
- Myelodysplastic syndrome – RCMD (refractory cytopenia with multilineage dysplasia),
- Myelodysplastic syndrome – RAEB-T (refractory anemia with excess blasts in transformation),

or

- Myelodysplastic syndrome – CMML (chronic myelomonocytic leukemia).

The following are not considered internal or invasive cancers:

- Pre-malignant tumors or polyps – Clark's Level I or II,
- Carcinomas in Situ – Breslow depth less than 0.77mm, or
- Melanoma in Situ – Stage 1A melanomas under TNM Staging

Non-Invasive Cancer is a cancer that is in the natural or normal place, confined to the site of origin without having invaded neighboring tissue.

For the purposes of the plan, a Non-Invasive Cancer is:

- Internal Carcinoma in Situ
- Myelodysplastic Syndrome – RAEB (refractory anemia with ring sideroblasts)
- Myelodysplastic Syndrome – RARS (refractory anemia with ring sideroblasts)

Cancer or non-invasive cancer must be diagnosed in one of two ways:

1. Pathological Diagnosis is a diagnosis based on a microscopic study of fixed tissue or preparations from the hemic (blood) system. This diagnosis must be made by a certified pathologist and conform to the American Board of Pathology standards.
2. Clinical Diagnosis is based only on the study of symptoms. A clinical diagnosis will be accepted only if:
 - A doctor cannot make a pathological diagnosis because it is medically inappropriate or life-threatening,
 - Medical evidence exists to support the diagnosis, and
 - A doctor is treating you for cancer or carcinoma in situ

Complete Remission is defined as having no symptoms and no signs that can be identified to indicate the presence of cancer.

Coronary Artery Bypass Surgery means open heart surgery to correct the narrowing or blockage of one or more coronary arteries with bypass grafts and where such narrowing or blockage is attributed to coronary artery disease or acute coronary syndrome. This excludes any non-surgical procedure, such as, but not limited to, balloon angioplasty, laser relief, or stents.

Critical Illness is a disease or a sickness as defined in the plan that first manifests while your coverage is in force.

Date of Diagnosis is defined as follows:

- Bone Marrow Transplant (Stem Cell Transplant): The date the surgery occurs.
- Cancer: The day tissue specimens, blood samples, or titer(s) are taken (diagnosis of cancer and/or carcinoma in situ is based on such specimens). This includes recurrence of a previously diagnosed cancer provided you are free of any signs or symptoms and are treatment free for that cancer for 12 consecutive months.
- Coronary Artery Bypass Surgery: The date the surgery occurs.
- Heart Attack (Myocardial Infarction): The date the infarction (death) of a portion of the heart muscle occurs. This is based on the criteria listed under the heart attack (myocardial infarction) definition.
- Kidney Failure (End-Stage Renal Failure): The date a doctor recommends that an insured begin renal dialysis.
- Major Organ Transplant: The date the surgery occurs.
- Non-Invasive Cancer: The day tissue specimens, blood samples, or titer(s) are taken (diagnosis of cancer and/or carcinoma in situ is based on such specimens). This includes recurrence of a previously diagnosed cancer provided you are free of any signs or symptoms and are treatment free for that cancer for 12 consecutive months.
- Stroke: The date the stroke occurs (based on documented neurological deficits and neuroimaging studies).
- Sudden Cardiac Arrest: The date the pumping action of the heart fails (based on the sudden cardiac arrest definition).

Dependent means your spouse or your dependent child. Spouse is your legal wife or husband, who is listed on your application. Dependent children are your or your spouse's natural children, step-children, foster children, legally adopted children, or children placed for adoption, who are younger than age 26. Newborn children are automatically covered from the moment of birth.

There is an exception to the age-26 limit listed above. This limit will not apply to any dependent child who is incapable of self-sustaining employment due to mental or physical handicap and is dependent on a parent for support. The employee or the employee's spouse must furnish proof of this incapacity and dependency to the company within 31 days following the dependent child's 26th birthday.

Diagnosis (Diagnosed) refers to the definitive and certain identification of an illness or disease that:

- Is made by a doctor and

- Is based on clinical or laboratory investigations, as supported by your medical records.

Doctor is a person who is:

- Legally qualified to practice medicine,
- Licensed as a doctor by the state where treatment is received, and
- Licensed to treat the type of condition for which a claim is made.

A doctor does not include you or any of your family members.

For the purposes of this definition, family member includes your spouse as well as the following members of your immediate family:

- Son
- Daughter
- Mother
- Father
- Sister
- Brother

This includes step-family members and family-members-in-law.

Employee is a person who meets eligibility requirements and who is covered under the plan. The employee is the primary insured under the plan.

Heart Attack (Myocardial Infarction) is the death of a portion of the heart muscle (myocardium) caused by a blockage of one or more coronary arteries due to coronary artery disease or acute coronary syndrome.

Heart Attack (Myocardial Infarction) does not include:

- Any other disease or injury involving the cardiovascular system.
- Cardiac arrest not caused by a heart attack (myocardial infarction).

Diagnosis of a Heart Attack (Myocardial Infarction) must include the following:

- New and serial electrocardiographic (ECG) findings consistent with heart attack (myocardial infarction), and
- Elevation of cardiac enzymes above generally accepted laboratory levels of normal. (In the case of creatine phosphokinase (CPK) a CPK-MB measurement must be used.)

Confirmatory imaging studies, such as thallium scans, MUGA scans, or stress echocardiograms may also be used.

Kidney Failure (End-Stage Renal Failure) means end-stage renal failure caused by end-stage renal disease, which results in the chronic, irreversible failure of both kidneys to function.

Kidney Failure (End-Stage Renal Failure) is covered only under the following conditions:

- A doctor advises that regular renal dialysis, hemo-dialysis, or peritoneal dialysis (at least weekly) is necessary to treat the kidney failure (end-stage renal failure); or
- The kidney failure (end-stage renal failure) results in kidney transplantation.

Maintenance Drug Therapy means ongoing hormonal therapy, immunotherapy or chemo-prevention therapy that may be given following the full remission of a cancer due to primary treatment. It is meant

to decrease the risk of cancer recurrence rather than the palliative or suppression of a cancer that is still present.

Major Organ Transplant means undergoing surgery as a recipient of a covered transplant of a human heart, lung, liver, kidney, or pancreas. A transplant must be caused by one or more of the following diseases:

- Bronchiectasis
- Cardiomyopathy
- Cirrhosis
- Chronic obstructive pulmonary disease
- Congenital Heart Disease
- Coronary Artery Disease
- Cystic fibrosis
- Hepatitis
- Interstitial lung disease
- Lymphangioleiomyomatosis.
- Polycystic liver disease
- Pulmonary fibrosis
- Pulmonary hypertension
- Sarcoidosis
- Valvular heart disease

A Major Organ Transplant benefit is not payable if the major organ transplant results from a covered critical illness for which a benefit has been paid.

Pathologist is a doctor who is licensed:

- To practice medicine, and
- By the American Board of Pathology to practice pathologic anatomy.

A Pathologist also includes an Osteopathic Pathologist who is certified by the Osteopathic Board of Pathology.

Signs and/or symptoms are the subjective evidence of disease or physical disturbance observed by a doctor or other medical professional. The doctor (or other medical professional) must observe these signs and/or symptoms while acting within the scope of his license.

Stroke means apoplexy due to rupture or acute occlusion of a cerebral artery. The apoplexy must cause complete or partial loss of function involving the motion or sensation of a part of the body and must last more than 24 hours. Stroke must be either:

- Ischemic: Due to advanced arteriosclerosis or arteriosclerosis of the arteries of the neck or brain, or vascular embolism, or
- Hemorrhagic: Due to uncontrolled hypertension, malignant hypertension, brain aneurysm, or arteriovenous malformation.

The stroke must be positively diagnosed by a doctor based upon documented neurological deficits and confirmatory neuroimaging studies.

Stroke does not include:

- Head injury
- Chronic cerebrovascular insufficiency
- Reversible ischemic neurological

deficits unless brain tissue damage is confirmed by neurological imaging

Stroke will be covered only if the Insured submits evidence of the neurological damage by providing:

- Computed Axial Tomography (CAT scan) images, or
- Magnetic Resonance Imaging (MRI).

Sudden Cardiac Arrest is the sudden, unexpected loss of heart function in which the heart, abruptly and without warning, stops working as a result of an internal electrical system heart malfunction due to coronary artery disease, cardiomyopathy, or hypertension.

Sudden Cardiac Arrest is not a heart attack (myocardial infarction). A sudden cardiac arrest benefit is not payable if the sudden cardiac arrest is caused by or contributed to by a heart attack (myocardial infarction).

Total Disability or Totally Disabled means you are:

- Not working at any job for pay or benefits,
- Under the care of a doctor for the treatment of a covered critical illness, and
- Unable to Work, which means either:
 - During the first 365 days of total disability, you are unable to work at the occupation you were performing when your total disability began; or
 - After the first 365 days of total disability, you are unable to work at any gainful occupation for which you are suited by education, training, or experience.

Treatment or Medical Treatment is the consultation, care, or services provided by a doctor. This includes receiving any diagnostic measures and taking prescribed drugs and medicines.

Treatment-Free From Cancer refers to the period of time without the consultation, care, or services provided by a doctor. This includes receiving diagnostic measures and taking prescribed drugs and medicines. Treatment does not include maintenance drug therapy or routine follow-up visits to verify whether cancer or carcinoma in situ has returned.

YOU MAY CONTINUE YOUR COVERAGE

Your coverage may be continued with certain stipulations. See certificate for details.

TERMINATION OF COVERAGE

Your insurance may terminate when the plan is terminated; the 31st day after the premium due date if the premium has not been paid; or the date you no longer belong to an eligible class. If your coverage terminates, we will provide benefits for valid claims that arose while your coverage was in force.
